

*This Issue is dedicated to Professor Mariana Craiu on her
70th anniversary*

C o n t e n t s

MATHEMATICS

Tribute to the merits to professor Mariana Craiu	3
Radu V. Craiu Tuning of Markov chain Monte Carlo algorithms using copulas	5
Romeo Bercia Exact solutions for an elliptical inclusion in plane elasticity	13
Lei Sun On the efficiency of genome-wide scans: A multiple hypothesis testing perspective	19
Simona Mihaela Bibic Harmonic wavelet analysis – connection coefficients for nonlinear PDE	27
Vlad Boicescu About probabilities on Lukasiewicz-Moisil algebras (I)	37
Constantin Tarcolea, Adrian Stere Paris Loss functions used in the quality theory	45
Constantin Udriste, Corina Cipu, Vasile Arsinte Tzitzeica 2nd order lagrangian dynamics	55
Gabriel Bercu, Claudiu Corcodel, Mihai Postolache Advances on hessian structures	63
Da-Xue Chen, Guang-Hui Liu, Yu-Hua Long Oscillation of certain nonlinear second-order damped delay dynamic equations on time scales	71
Yuji Liu Positive solutions for singular FDES	89
Rashid Abdur, Ahmad Izani Bin Md. Ismail Numerical studies on two-dimensional Schrödinger equation by Chebyshev spectral collocation method	101

Madjid Eshaghi Gordji A characterization of (σ, τ) derivations on von Neumann algebras	111
Jianming Zhan, S.Sh. Mousavi, M. Jafarpou On hyperactions of hypergroups	117
Iuliana Paraschiv-Munteanu Numerical study for an elastic-viscoplastic models in geomechanics	129
Dana Mihaela Petrosanu Contributions to the study of large strain solid	139

PHYSICS

Ionel Tunaru, Ralf Widenhorn, Dan Iordache, Erik Bodegom Computational approach to dark current spectroscopy in CCDs as complex systems. II. Numerical analysis of the uniqueness parameters evaluation	149
Lucian Stroe Characterisation of different target – ion source units for the production of radioactive ion beams by the isol method	163
Dumitru Bolcu, Marcela Ursache, Sabin Rizescu, Sonia Degeratu, Nicu George Bizdoacă, Marius Marinel Stănescu The utilization of elasticity matrix spectral decomposition in calculating the elastic properties of a composite bar having transverse isotropy	177
Dorin Dudu, Ion Vata, Paul Schiopu Preliminary experiments of tapered glass capillary optics used as focusing systems for MeV ion beams	189
Cristian Viespe, Constantin Grigoriu, Constantin Toader, Ion M. Popescu Nanocomposite coated surface acoustic wave sensor for chemical warfare agent detections	195
Ecaterina C. Niculescu, Florin Burcea Electric field effect on the interband transitions in near-surface quantum wells	201
